Championing the Way with skills

The WorldSkills UK Championing the Way project is an exciting way to bring careers and employability skills to life through experiential peer-led sessions for secondary and college students.

Each session is delivered by our Skills Champions - young professionals who have competed in skills competitions at national or international level. As peer role models they offer a unique insight of routes into employment and tips for success to inspire students.

Each session can last up to two hours but is flexible to the needs of the school or college. It includes:

- An interactive workshop to try out the skills used in careers like engineering, media, IT, hospitality and construction.
- Skills Champion talks from young professionals on their journey into employment.
- Industry insight from a local or national employer.

Register to participate at worldskillsuk.org/championing or for more information, please contact skillschampions@worldskillsuk.org

WorldSkills UK champions world-class apprenticeships and technical skills. We do this by engaging young people in skills competitions, delivering experiential careers events, role modelling to challenge stereotypes and using our research to support the apprenticeship agenda. Our goals are to support business competitiveness, young people's employability and excellence in standards. WorldSkills UK brings together WorldSkills UK Competitions, The Skills Show and WorldSkills UK Champions.
