

Readme; NIT preparation paper

The files provided are listed below with a description of their purpose:-

Packet Tracer Answer File : A completed packet tracer file that can be referenced, which has the technology, asked for, implemented (note: some of the IP addresses may differ from those used within the paper .

Subnetting task empty table and solution: This file has a blank table for the subnetting element, as well as a possible solution for the subnetting task provided in the 2nd worksheet of the spreadsheet.

Task Marking Scheme: This is a marking scheme that can be used to mark the paper provided. Not all requested tasks are marked – mainly due to the limitation of 50 marks. The spreadsheet will summarise the tasks into their groupings provided on the summary worksheet.

Task Preparation: The actual question paper to be provided to the candidates.

Task_: a Packet tracer activity file which has a starting point for the candidates to begin the network configuration elements – note the file is configured to prevent access to the config tab (where possible) to ensure that the candidates will use the command line for configuration.

Software dependencies:-

Packet tracer requirements 6.1 and higher

Word 2010 and above, Excel 2010 and above
