# Industrial Electronics Competition

Join our **Industrial Electronics Competition** to boost your skills and employability!

This competition focuses on the requirements and standards for a successful career in industrial electronics. Competitors will have a thorough understanding of design and theory associated with the fundamentals of electrical, analogue, and digital principles.

Examples of the skills you will demonstrate during the competition:

• Analysis and design of various circuits
• Embedded systems programming
• Fault finding, repair and measuring module

## Registration

• Registrations are open between 26 February and 28 March 2024
• Top performers in National Qualifiers move on to the National Finals in November
• For registration inquiries, contact enquiries@worldskillsuk.org or call 0800 612 0742.
